

INTRODUCING: THE NEW SOCIAL CONCEPT IN CAMPING

Introduction

Modular Camping Experience

Pod the world's first modular camping experience exclusively designed and engineered in the UK, as British as a Sunday Roast. The POD adds a fun new twist to the iconic summer staple, with two sizes to choose from, a refreshingly simple build process and pocket friendly pricing.

Totally innovative and created to transform the traditional camping experience, POD is a range of beautifully original tents that are built to be connected together. A social camping experience, users can POD their space with interconnecting tents to build a bespoke accommodation layout on the fly.

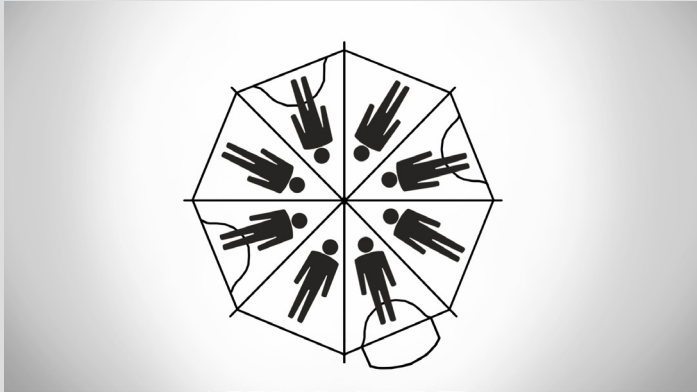

Introduction

By reimagining the concept of form and function, POD has solved a number of common issues with the traditional tent. Perfect for those who want to express their individuality, the POD is the antithesis of standard tents with the two sizes, POD Maxi and POD Mini can be connected in a multitude of ways. There are no complicated set up instructions to wrestle with making pitching quick and easy and inhabitants do not need to crouch and stoop. Designed to be enjoyed, the POD Maxi and POD Mini unite seamlessly to give endless community opportunities.

Jason Thorpe director of designers M2C Innovation said, “We believe the POD is the first truly versatile social camping tent experience. It is the tent reinterpreted for a new generation. As much social experience as a way of enjoying the great outdoors, the fun of POD is that each unit can be joined together with any other, in any way, to build whatever the user wants. We wanted to put the fun back into camping and with this ground breaking range, we think we have achieved this. We have worked hard to refine the design and construction of POD, incorporating features such as twin windows, higher wall vents and increased ventilation meaning the 2014 collection is second to none. Whether you’re off to a festival in a field or foreign shores, POD is an essential companion for friends and families who want to holiday together and have the option of privacy.”

POD Maxi
